All classes are 2 hours long. They will be divided into 4 math, 4 reading, and 4 writing sessions. This division can be altered if there is an obvious need for more intensive study in one subject area over the others based on class performance on the practice exams.

All tests are 3 hours and 45 minutes long and are actual SATs written by the College Board. They will be administered in the same fashion as actual SATs with the exception that there will be no experimental section since experimental sections are never released by the College Board.
